

Riada

Makers of Insight Enterprise Asset Management

[Get Started](#)

description

Riada offers add-ons to increase traceability, automation, and functionality for JIRA.

As U.S. Riada Service partners, we offer solutions including licensing, implementations, configuration, and consulting around their suite of Marketplace add-ons. Enhancing the value and functionality of JIRA within your organization, our Riada services help increase reporting and automation of business-critical items like assets and inactive users within JIRA.

Insight Enterprise Asset Management

Manage and control your assets in JIRA with automation, integration, visualization, reporting and open API's.

Insight Discovery

Insight Discovery provides a repeatable and reliable method to identify the elements of enterprise IT infrastructure, making it possible to capture an accurate and up-to-date view of all CI's, from hardware to software.

Notification Assistant

Notification Assistant for JIRA makes it possible for administrators to create notifications based on any JQL query. Configure notifications to trigger at any point in time and at any given interval.
